

CMMC Symposium 2023: „From Concepts to Clinic: A New Era of Nucleic Acid Therapeutics“

The CMMC Symposium 2023 in Molecular Medicine - integrating the 37th Ernst Klenk Symposium - will address challenges „From Concepts to Clinic: A New Era of Nucleic Acid Therapeutics“ and provide insight into the state-of-the-art pharmaceutical development.

The scientific program includes the following six sessions:

Session 1 - Nucleic acid chemistry (Innate Immunity)

Session 2 - Nucleic acids delivery and visualization

Session 3 - Technology and future applications (e.g. mRNAs, ncRNAs)

Session 4 - Technology and applications development (e.g. Aptamers, RNAi, snRNAs, ASO)

Session 5 - CRISPR and RNA-protein interaction and modulation

Session 6 - Preclinical and clinical application

Call for the submission of poster abstracts - deadline: August, 08, 2023
